1. What is imagination?  
 Ans: The activities of desire, thoughts and expectation at the level of self, are collectively called as imagination.

Imagination = desires + thought + expectations.  
 We all imagine, and most of our activities (in the self) today can be mostly clubbed into imagination. It is continuous and not temporary. The power may change but the activity is continuous. The object of the task may change but the activity of selecting lasting is continuous. Also what we analyse may keep changing the activity of analysing is continuous. We make choice with the external world based on our imagination today.

Q. No. I of. What is the basis of respect for a human being? Do you see the other human being is also similar to you? Explain.

Ans: Respect means 'individuality'. The sense of individuality is prime object. This is the first basic step towards respect (samman). Once we realized that we are individual then only we can see ourselves different from others. In other words, respect means 'right' evaluation, to be evaluated as 'I am'. If we respect a human being on the basis of 'I', following things are true for every human being.

1. I want happiness and prosperity.
- \* The other too wants to be continuously happy and prosperous!
2. To be happy, I need to understand and live in harmony at all four levels of my living.
- \* The other also needs to understand and live in harmony at all four levels of his/her living!
