

International Conference on Internet of Things (IConIoT-2k17)

28th February & 1st March, 2017

Email: iconiot@appaengg.org

http://www.iconiot.appaengg.org

Organised by: Centenary Celebrated Sharnbasveshwar Vidya Vardhak Sangha's

INSTITUTE OF ENGINEERING & APPA TECHNOLOGY, KALABURAGI GODUTAI ENGINEERING COLLEGE FOR WOMEN, KALABURAGI

VEERAPPA NISTY ENGINEERING COLLEGE, SHORAPUR, YADGIR LINGARAJ APPA

ENGINEERING COLLEGE, GORNALLI, BIDAR

In Association With

Department of Computer Science (UG & PG), Sharnbasveshwar College of Science, Kalaburagi P G Department of Tourism Studies (MTA), Sharnbasveshwar College of Arts, Kalaburagi PG Department of Journalism & Mass Communication, Godutai Degree College for Women, Kalaburagi

Doddappa Appa Institute of MBA, Kalaburagi Doddappa Appa Institute of MCA, Kalaburagi Department of BCA, Sharnbasveshwar College of Commerce, Kalaburagi Muktambika College of BCA for Women, Kalaburagi

Doddappa Appa College of BCA, Basavakalyan, Bidar

IConIoT- 2k17

Theme: IConIoT-2k17

IOT is for Students, Teachers, Researchers, Doctors, Farmers, Smart Cities, Soldiers/ Security Agencies, Industries, Governance & Communication. IConIoT-2k17 can be a potential platform through which efforts are being put to bring together the developers of IoT and its potential users for direct face to face interactions/ dialogs/ discussions.

The potential users in general are people from all walks of life, especially people from Healthcare, Farming Community, Business Community, Industries & Organizations etc.

The developers of IoT includes IT Professional, Teachers and Students of CSE, ECE, ISE, EEE, CIVIL, MECH etc., branches. Also Researchers & Professionals from both Academia and Industries.

APPA Institute of Engineering & Technology Main Building

IConIoT-2k17

KEYNOTE SPEAKER

1. Mr. Shivakumar Mathapathi CEO, Co-founder DEW Mobility, Fremont, California, USA

EXPERT SPEAKERS FROM

Universities / Institutions / Industries

- 1. Dr. Martin Serrano Research Head IOT National University of Ireland, Galway, Ireland, UK
- 2. Dr. Prem Prakash Jayaraman Research Fellow Swinburne University of Technology, Melbourne, Australia
- 3. Dr. Safia Fatima сто Minds Solvit Pvt. Ltd. Kalaburagi, Karnataka, India
- 4. Mr. Siddaram Hebbal Software Developer Minds Solvit Pvt. Ltd. Kalaburagi, Karnataka, India

TOPICS TO BE COVERED

- 1. Introduction to IoT & its Applications
- 2. Health Care wellbeing IoT Applications/ Projects
- 3. Agriculture IoT Applications/ Projects
- 4. IoT in Defence
- 5. IoT & Cloud Computing
- 6. IoT enabled Smart City Projects

IConIoT-2k17

IConIoT-2k17 International Conference on Internet of Things

Agenda Tuesday, February 28, 2017

08:00 am - Registration and Tea at Main Auditorium

08:30 am - Introduction to the Conference by Host

08:45 am - Keynote: Introduction to IoT and its

Applications: Speaker, Mr. Shivakumar Mathapathi

10:30 am - Tiffin and Networking Break

11:00 am - Event Inauguration

12:30 pm - Lunch

01:30 pm - Healthcare and Wellbeing IoT Applications : Speaker, Dr. Martin Serrano

03:30 pm - Coffee/Tea Break

04:00 pm - Agriculture IoT Applications: Speaker, Dr. Prem Jayaraman

06:00 pm - Adjourn Day 1

Agenda Wednesday, March 1, 2017

08:00 am - IoT in Defence: Speaker, Dr. Safia Fatima

IoT in Cloud Computing: Speaker, Mr. Siddaram Hebbal

08:45 am - IoT in Agriculture: Speaker, Dr. Prem Prakash Jayaraman

10:00 am - Tiffin and Networking Break

10:30 am - Healthcare and Wellbeing Projects : Speaker, Dr. Martin Serrano

12.30 pm - Lunch

01:30 pm - IoT- enabled Smart City Projects - use model : Speaker, Mr. Shivakumar Mathapathi

02:30 pm - Poster presentations by Students of Appa Institute of Engineering & Technology

04:00 pm - Coffee/Tea Break

04:30 pm - Round Table : Moderator, Mr. Shivakumar Mathapathi.

Co-Moderator, Host team.

05:30 pm - Concluding remarks by Mr. Shivakumar Mathapathi/Host team.

06:00 pm - Adjourn Day 2

A brief Report

on

International Conference on Internet of Things (IConIoT-2k17)

An International Conference on Internet of Things (IConIoT-2k17) was conducted on 28th feb and 1st march of 2017 at Appa Centenary Hall of our Sangha in association with Sharnbasva University, Kalaburagi.

As we know IOT is an emerging field and a new concept involving larger number of heterogeneous objects of everyday life. They enable large scope of new applications that require all these objects to communicate, interact, to share data and processes. In the fields like hospitals, agriculture, automobile, power engineering, smart grid, transportation, defence, home applianceses etc.these fields will have exciting benefits. Resource persons from Australia, USA,UK and India participated in the deliberations. Among them few are:

- Dr. Martin Serrano, Research Head IOT
 National University of Ireland, Galway, Ireland, UK
- Dr.Prem Prakash Jayaraman, Research Fellow, Swinburne University of Technology, Melbourne, Australia.
- Dr.Safia Fatima CTO
 Minds Solvit Pvt.Ltd ,lKalaburagi,Karnataka,India
- Mr.Siddaram Hebbal Software Developer
 Minds Solvit Pvt.Ltd. Kalaburagi, Karnataka, India.

More than 60 quality papers were presented in this International Conference.

It immensely benefitted teachers and students .

His Holiness Poojya Dr.Sharanbaswappa Appa President, Sharanbasaveshwar Vidya Vardhaka Sangha, kalaburagi

I am extremely happy to host an International Conference on "Internet of things-IConIoT-2k17" organized by all the four Engineering colleges of our organization along with our sister institutions run by Sharanbasaveshwar Vidya Vardaka Sangha,

In the stiff and competitive global markets of 21st century, we must come together to have ideas and resources so that we can plan and create a better future for the next generation of students, faculty and researches. As IoT is an open platform for Students, Teachers, Researches, Doctors, Farmers, smart cities, Soldiers/ Security Agencies, Industries, Governance & Communication. I hope this conference addresses the needs of Participants & General public at large

I welcome you all to undergo a memorable experience "IConIoT-2K17" and convey my best wishes for the grand success of this International conference.

Shambasunde

PRESIDENT

Motoshree Dakshayani Awwaji

Chairman, Sharanbasaveshwar Vidya Vardhaka Sangha, kalaburagi

I am delighted to know that Godutai Engineering College for women which is the one Engineering College exclusively for women in entire North-Karnataka region is organizing an International conference on "Internet of things IConIoT-2k17" along with its sister Institutions.

This conference is a step forward to provide a platform for students researches, academicians, from different Institutions and Practicing Engineers from various Industries in India and abroad to discuss & interact with experts on Internet of things.

I welcome all the delegates on the behalf of Sharanbasaveshwar Vidya Vardhaka Sangha Kalburgi, and extend my sincere appreciation for efforts of all the organizers.

I wish the organizers and participants a grand success.

Chairman

Sri. Basavaraj Deshmukh Secretary, Sharanbasaveshwar Vidya Vardhaka Sangha, Kalaburagi

Our revered president, His Holiness Poojya Dr. Sharanbaswappa Appaji has given us a finest opportunity to go ahead to conduct the International Conference on Internet of things (IConIoT-2k17) from 28th February 2017and 1st March 2017

The program committee, chair & its members of IConIoT-2k17 feel much elated and inspired to organize such an INTERNATIONAL CONFERENCE which rejuvenates them and provides them with an opportunity to express their managerial skills, may it be to Technical or may it may it be organizational one.

I would like to take this opportunity to thank every member of IConIoT-2k17for the hard work, talents, dedication & enthusiasm in making this conference to take place & make it a grand success.

I hope you will enjoy the excellent, academic & cultural atmosphere of IConIoT-2k17 prevailing in our beautiful sprawling campus Sharn Basveshwar Vidya Vardhaka Sangha.

SECRETARY

Sharnbasaveshwar Vidya /ardhak Sangha, KA: DURGI

Sri. Priyank Kharge IT, BT & Tourism Minister

I am happy to know that four Engineering Colleges Affiliated to VTU, Belagavi ,of Sharanbasveshwar Vidya Vardhaka Sangha along with its Sister Institutions is organizing an International Conference on "Internet of Things IConIoT-2k17" on 28th Feb 2017 & 1st March 2017. I hope this conference addresses the needs of participants and the general public at large.

I wish the organizers and participants a grand success.

Message from Conference Chair

Dr. V D Mytri

Principal, Appa Institute of Engineering & Technology, Kalaburagi

Our college feels a sense of happiness and great pride in hosting this International conference on "Internet of Things (IConIoT-2k17)"

Internet of things is a multidisciplinary approach covering wide areas of health science, smart cities, Defense, Governance etc, which will help a large public. Papers have been received from various parts of Karnataka through easy chair review process overseen by a five member program committee. These papers cover almost all the areas of internet of things & selected papers will be published in a reputed ISTE journal.

I would like to thank every member of IConIoT-2K17 for their hard work and dedication in making this International Conference a grand success.

I wish the organizer and participants a grand success.

Principal

Dr. S S Chetty Director, PG Director, Sharnbasveshwar College of Science, Kalaburagi

Academic excellence has always been the hallmark of our institute and we are committed to provide a comprehensive education which seeks to develop the students into academically proficient, morally upright & socially well integrated students.

This international conference organized by our engineering colleges with its sister institutions well benefit our students, faculties, researchers and general public at large.

I thank all organizers for their hard work & wish all of them for grand success of this conference.

Dr. S.S. Chetty

Coordinator IQAC

Septeas

SHARNBASVESHWAR COLLEGE OF SCIENCE, GULBARGA

Dr. Martin Serrano

Unit Head and Research Scientist Internet of Things and Stream Processing

Dr. Serrano is the research director and scientific coordinator at the Internet of Things Unit (UIoT) within the Insight Centre for Data Analytics Galway (former DERI) at the National University of Ireland. Dr. Serrano is an ICT expert with more than 15 years experience in industry and applied research within a wide range of successful European (FP5-FP7/H2020) collaborative software projects, Irish National Projects (HEA PRTLI, SFI) and also Enterprise Future Internet Research leads innovation projects. He also (EI) Ireland Experimentation(FIRE)activities Platforms and the FIRE FIESTA-IoT project. Dr. Serrano is a recognized IoTexpert on semantic interoperability and Smart Citiestechnology architectwith a strong background on applied semantic and systems interoperability, services and network management technologies. He has a leading role in the European Research Cluster for the IoT and he is board member at the Connected Smart Cities Network. Dr. Serrano is a continuous contributor to the Scientific, Research and Innovation agenda for Europe. He is also actively investigating, Semantic-based Cloud Infrastructures and Big Data Management. Data Bases Stream processing, Cyber-Physical Systems (CPS) Control, Privacy and Security aspects for IoT, Sensor Networks for the IoT and their deployment in cloud computing environments. Dr. Serrano is an active member of IEEE (Computer and Communication Societies) and ACM and He is the author of the book "Applied Ontology Engineering in Cloud Services, Networks and Management Systems" published by Springer, NY, USA.

The Internet of Things is changing our perspectives and the way we perceive the virtual and physical worlds, from how we perform daily activities (e.g. home cooking, move from work to home, know the conditions of the weather and traffic, make our shopping and payments, etc.) to how we understand the dynamics in a city(e.g. traffic flows with sensors, informative displays in real time, etc.)

Dr. Prem Prakash Jayaraman Swinburne University of Technology, Australia

The Internet of Things (IoT) is the latest web evolution that incorporates Billions of devices that are owned by different organizations and people who are deploying and using them for their own purposes. IoT is the next big wave in computing and with applications across virtually every domain ranging from healthcare to manufacturing, it has the potential to influence and change the ways we live and interact with our world.

The Internet of Things Conference (IconIoT 2K17) is timely and I am glad to be part of this conference, presenting and discussing the current advancements in Internet of Things and related areas. I believethe conference is a fantastic platform for students, academics and industry to interact, exchange ideas and explore opportunities in harnessing the full potential of the Internet of Things ecosystem. Looking forward to a successful and fruitful conference.

Bio:

Dr. Prem Prakash Jayaraman is a Research Fellow in the Internet of Things Key lab at Swinburne University of Technology. Previously he was a Research Scientist in the Digital Productivity and Services Flagship of Commonwealth Scientific and Industrial Research Organization (CSIRO - Australian Government's Premier Research Agency). He is broadly interested in the emerging areas of Internet of Things (IoT), Mobile computing and Cloud Computing. He has more than 50 publications in top-tier Journals and Conferences. He is the author of the

edited book "Handbook on Integration of Cloud Computing, Cyber Physical Systems, and Internet of Things" to appear in Spring in late 2017. You can contact him via email piavaraman@swin.edu.au

INTERNET OF THINGS (IOT): APPLICATIONS AND SECURITY ISSUES REGARDING IMPLEMENTATION

Dr.Basavaraj S Mathapathi¹, Mr. Mallanagouda Biradar²

1.2 Department of Computer Science & Engineering

1.2 APPA Institute of Engineering & Technology, Klb.

Abstract

The Internet of Things (IoT) is a powerful paradigm that has made progress in the almost every field of human life. This paper gives an overview of IoT, its enabling technologies, applications and security issues in the wireless technologies. IoT is enabled by a number of different technologies such as Radio Frequency Identifiers (RFID), and Wireless Sensor Networks (WSN). There are huge number of applications of IoT in almost every aspect of life i.e. healthcare, logistics and supply chain management, smart environment and social application etc. only a few of these applications are discussed in this paper. Security is an important concern of wireless networks and so it is one of the main issues in IoT. This paper gives an overview of the few of many security concerns in an IoT system and methods to prevent those issues.

LITERATURE SURVEY ON MIDDLEWARE DESIGN IN 10T

Madhura Shettar¹, Dr. S. V. Saboji²

¹PG Student, ,madhura.shettar1993@gmail.com

Basaveshwar Engineering College, Bagalkot, India

Abstract

The Internet of Things (IoT) has been introduced to combine the effective world of information and the real world of devices. The infrastructure, which can be software, hardware and services are covered by internet of things to support the networking of physical objects. In IoT, there are various devices and networks. Their diversity can be potentially enhanced with advanced technologies. To facilitate the utilization of the devices by IoT applications, we should protect their heterogeneity. Therefore, we need to develop an assured, scalable and semantically augmented service-oriented middleware to manage the heterogeneity of devices. This paper surveys the middleware designed for IOT, focuses on the technical challenges of designing middleware systems for the IoT [5] and modules address these challenges of internet of things those are event-Based Middlewares, Service-Oriented Middlewares, Tuple-Based Middlewares.

EMERGING TECHNOLOGIES, SMART INTEGRATION, CHALLENGES AND APPLICATIONS OF INTERNET OF THINGS (10T) IN ELECTRICAL, COMMUNICATION AND SOFTWARE ENGINEERING

Gauri Kalnoor¹, Shama P.S², Suhashini³, BVVN Manikanta⁴, Bala Murali Krishna. V⁵ 1,2,3,5 Assistant Professor, School of Engineering, C.U.K -585367, ⁴M.Tech (Power Systems), K.L University - 520 002

Abstract

This paper presents the basic principles and technologies of Internet of Things (IoT) in the broad areas of Electrical, Communication and Software Engineering application. The IoT shows the a very broad impact on organizations to switch into new product business, affecting the existing business strategies, risk management, smart integration and a wide range of technical areas such as architecture, telecommunication, energy and network design. The current status of IoT technologies and policies in India is briefly discussed this paper.

VOICE RECOGNITION AND MONITORING OVER INTERNET OF THINGS (IoT)

Sagarkumar V. Budihal, Department of Electronics and communication, Maratha Mandal Engineering College, Belagavi, karnataka, India sagar.budihal@yahoo.com

Abstract.

The Internet of Things (IoT) is aimed at enabling the interconnection and integration of the physical world and the cyber space. It represents the trend of future networking, and leads the third wave of the IT industry revolution. First I introduce some background and related technologies of IoT and discuss the concepts, objectives of IoT and challenges and key scientific problems involved in IoT development. Finally, we outline future research directions.

STUDY OF 10T APPLICATIONS AND ITS ADVANCEMENT USING WIRELESS TECHNIQUE FOR EFFICIENT POWER CONSUMPTION AND MANAGEMENT

Saba Anjum¹, Zainab Ibtesham M², Shruti Hanchanal³ Electronics and communication department, Godutai Engineering College for women, Kalaburagi, Karnataka(India)

Abstract

Internet of things is a concept of technology and an architecture which is an aggregation of already available technologies. With the acceleration of IOT, wireless sensor networks (WSNs) are gaining importance in continued advancement of information and communication technologies and it have been connected and integrated with the internet in vast industrial applications. However given the fact that most WSNs are resource constrained and operate on batteries, the communication overhead and power consumption are important issues for WSNs design. The different low power wireless communication techniques such as ZigBee, low power wi-fi, lowPAN, LPWA are used to conserve power and longing the life for IOT network sensors. In order to efficiently manage these wireless sensor devices in unified manner, the industrial authorities should be able to provide a network infrastructure supporting various WSN application and services that facilitates the management of sensor-equipped real-world entities. This paper presents the basic introduction and a brief growth of IOT in section1. Structure of IOT in section2, then it describes the wireless connectivity technology and sensor networks in section3. A research activity in developing a WSN management system is discussed in section4. The key approach to enable efficient and reliable management of WSN within an infrastructure is a cloud based RESTful Web Service. The last section5 will give the conclusion about the study.

COMPREHENSIVE PLATFORM FOR ENERGY DISTRIBUTION, MONITORING CONTROL USING INTERNET OF THINGS

Shweta Eranna*, Kumari Vatsala, Supriya**, Geeta.K.

Abstract

The plug load devices in building sectors are consuming close for example water heater. By measuring current and voltages we can analyze energy consumption make the world smarter place make better discussion using IOT. Resources lagging behind, so in present day's energy efficient technologies are introduced. Power is one of the resources which need to be monitored and controlled as per the needs. So electricity consumption is increased day by day.

Power play important role in human life. So lack of power is been wasted. We cannot ensure how much power consumes until we get tariff to overcome this by using wireless sensor network. By using this sensor we can monitor and control the power usage, to 40% of total electric city consumption. Through the share of plug load in building energy is increasing very few studies exist on the plug level energy usage and consumption.

UNDERGROUND CABLE FAULT DISTANCE LOCATOR USING INTERNET OF THINGS (IoT)

Anjali Priyadarshini¹, 2Swati Kumar², 3Krishna³, Praveen Reddy⁴ 1,2,3 Undergraduates, Department of Electronics and Communication Engineering ⁴Assistant Professor, Department of Electronics and Communication Engineer 1,2,3,4 Guru Nanak Dev Engineering College, Bidar.

Abstract

The objective of this project is to determine the distance of underground cable fault from base station in kilometers. The underground cable system is a common practice followed in many urban areas. While a fault occurs for some reason, at that time the repairing process related to that particular cable is difficult due to not knowing the exact location of the cable fault. The proposed system is to find the exact location of the fault. The project uses the standard concept of Ohms law i.e., when a low DC voltage is applied at the feeder end through a series resistor (Cable lines), then current would vary depending upon the location of fault in the cable. In case there is a short circuit (Line to Ground), the voltage across series resistors changes accordingly, which is then fed to an ADC to develop precise digital data which the programmed microcontroller of 8051 family would display in kilometers. The project is assembled with a set of resistors representing cable length in KM's and fault creation is made by a set of switches at every known KM to cross check the accuracy of the same. The fault occurring at a particular distance and the respective phase is displayed on a LCD interfaced to the microcontroller. Further this project can be enhanced by using capacitor in an ac circuit to measure the impedance which can even locate the open circuited cable, unlike the short circuited fault only using resistors in DC circuit as followed in the above proposed project.

A STUDY ON SECURITY, PRIVACY AND TRUST FOR SMART OBJECTS IN INTERNET OF THINGS

Sobiya Nazneen Mujahid*, Mohammed Shafeeq Ahmed** * M.Sc. 4th Semester, Department of P. G. Studies and Research in Computer Science, Gulbarga University, Kalaburagi nazneensobiya@gmail.com ** Student Member, IEEE, PhD Scholar, Bharathiar University, Coimbatore, mohammedshafeeq.ahmed@gmail.com

Abstract

Earlier Internet connects places, then people and now in this era it connects things and arises a new concept Internet of Things (IoT). IoT penetrates all aspects of human life and handles the huge volume of data (big data), so security and privacy concepts including access control, authentication and confidentiality play a major role in IoT to enforce trust in a dynamic environment. The user acceptance of IoT is enormously high and is always collecting sensitive information so privacy preservation and security in Trust Management in IoT is a big challenge in its research area. Since the current researchers lack a comprehensive study on the enhancement of security in IoT, in this paper we investigate the main research challenges in this field and identify the unsolved problems. It also proposes a unique trust management framework for mobile devices by considering security related issues.
